

Progress report

Currently working on,

- Understanding CNN concepts
- Basic Pytorch Resnet implementation
- CNN image classification tensorflow
- CNN image classification google colab , Kaggle
- Image classification using CNN (CIFAR10 dataset)

Future steps,

- Check the possibility of splitting layers
- Look for literature
 1. Split Computing for Mobile Devices: Energy and Latency Perspective
 2. Cost-Aware Neural Network Splitting and Dynamic Rescheduling for Edge Intelligence
 3. Split Computing With Scalable Feature Compression for Visual Analytics on the Edge
 4. Split Convolutional Neural Networks for Distributed Inference on Concurrent IoT Sensors
 5. Partitioning Convolutional Neural Networks to Maximize the Inference Rate on Constrained IoT Devices
- Tutorials
